

NORTH TINTIC IS COMING OUT FAST

Success of Scranton Company Encourages Others to Work Their Ground.

DEVELOPMENTS AT DEPTH ARE GOOD

Nichols Tintic Company Will Encounter Vein Which Is Rich.

The North Tintic district which has been sadly neglected by mining talent for a number of years bids fair to blossom out into one of the State's most interesting regions within the first few months of the coming year. Results are being obtained at this time upon numerous properties, and several other companies are preparing for active operations. George H. and Theodore Nichols have owned a group of North Tintic claims for several years, and considerable work has been done upon them. Their group is not far from two miles north of the Beck tunnel ground, and within easy reach of the Scranton. These two brothers have just completed among other workings a tunnel which is in a distance of 150 feet.

At the 140-foot point they encountered a fissure which carried no values whatever. But continuing, however, ten feet farther they have run into a streak of good ore which they thought was the vein which crosses the group and whose outcroppings have furnished two shipments of fifty tons each to the local market. An expert making an examination of this working, however, was of the opinion that this stringer was merely leading from the vein, and that the resource proper was yet some distance in the mountain. Consequently a company was formed Friday, known as the Nichols Tintic company with John Y. Smith, the Lehi banker as president, for the purpose of taking over this group and rushing development work without delay along lines laid out by the examining expert. George H. Nichols stated to the Tribune Saturday that the hundred tons of ore shipped by himself and brother came from the outcroppings of the vein which is to be cut by the tunnel. This ore ran all the way from \$35 to \$70 per ton, carrying lead, silver and gold. For several years the North Tintic region has not been seriously considered by mining men, the supposition being that most all the ore of the district was near the surface and not worth going after. This opinion is rapidly changing, and no mine has served a better purpose in correcting this opinion than the Scranton, whose deeper workings have disclosed what is universally conceded to be one of the banner systems of resources in the

State. The Scranton veins are large and rich, and the Nichols Tintic of- ficials see no reason why their property should not disclose equally good re- sources. The Nichols brothers are Utah men, and they have spent the better part of their lives in the Tintic and North Tintic districts. The efforts of this new company, which should meet with speedy returns, will be watched closely by all who are interested in this part of mining Utah.

NEW COPPER CAMP.

South of Ely Is Budding Rival for This Famous Camp.

What bids fair to be a substantial rival to the camp of Ely, if all reports are to be seriously considered, is a district thirty miles or less south of the great Ely copper camp, not yet named or thoroughly explored. From what has been gathered in this city, this new region is giving up some copper values which would make Ely's lower grade ore seem extremely modest in comparison with the new re- sources show any great strength. It is stated in local circles that when the story of this region is given to the public it will be seen how active and up-to-date are the mining men and investors of Salt Lake. They were among the first on the ground.

W. J. Craig, the mining engineer, is said to be on the scene at this time, and his early arrival in Zion is anxiously awaited by those who are interested enough in this new camp to desire being still more interested. It is pointed out that this country is on a line from Ely to Pioche, and should a railroad line be extended between these two points there would be little in the transportation way to be desired for this district. Then a direct line from Salt Lake and beyond the Deep Creek camps would also give abundant railroad facilities. It is to be hoped that upon Mr. Craig's arrival he will be able to give definite news regarding this camp.

It is certain that some exceptionally rich specimens of copper ore have been shown in Salt Lake from this territory within the past week or two, and inner circles are convinced that properties producing such rock are worth investigating thoroughly.

UTAHNS AT SEVEN TROUGHS.

S. M. Levy Returns From This Inter- esting Mining District.

S. M. Levy, of the National Develop- ment company, has returned to Salt Lake from the Seven Troughs Mining district of Nevada, a point which has attracted considerable Utah money and talent. Among the Utah operators whose properties in the Seven Troughs district are attracting the attention of visitors is John Clegburn, and his group is producing silver ore in gener- ous quantities. Mr. Levy did not visit this property, but he states that twelve leasers have started work upon this ground which might be taken as one evidence of how the property is re- garded by those who have made an ex- amination of it. This group holds a well defined contact vein.

South of the Clegburn property is a group of claims which contains some very fine gold ores. This group has often been purchased or tied up by Jesse Knight and Lafayette Holbrook, of Utah, and Mr. Holbrook recently ex- pressed his entire satisfaction over this property to the Tribune. Mr. Levy states that he saw some remarkably rich gold specimens from this group. There are two towns in the immediate vicinity of Seven Troughs, Seven Troughs and Vernon by name. Vernon, states Mr. Levy, is nearest the properties above mentioned, but Seven Troughs has the water. Vernon has taken on all the characteristics of a boom Nevada mining camp. Town lots are selling for good figures, and while the citizens are still grabbing out the sage brush from the main streets,

Reduce Your Fat

Rengo Fruit Rapidly Reduces Excess Fat Without the Aid of Tiresome Exercises or Starvation Diet.

COSTS NOTHING TO TRY.

This Illustration Plainly Shows How Rengo Fruit Acts.

It will reduce excess fat and build up the strength and health of anyone who eats it regularly for a short time. It is a product of nature, delicious to the taste and safe and harmless in all its properties. It will not in- jure the digestive organs, as so many drugs and medicines do.

Rengo Fruit will positively reduce surplus fat rapidly and do so without harm to the subject. It is very palatable and pleasant to eat. It is prepared in a highly concentrated form and is convenient to carry in the pocket, so one can have it with him at all times.

Rengo Fruit requires no exhausting exer- cises or starvation dieting to help it out, as so many of the so-called fat remedies do. You can go right ahead and attend to your regu- lar daily duties. It compels proper assimila- tion of the food and sends the food nutri- ment into the muscles, bones and nerves and builds them up instead of piling it up in the form of excess fat. It is a mild, pleas- ant, harmless fruit preparation, put up in

concentrated form in small packages for con- venience.

If you suffer from excess fat send your name and address today for a trial package of Rengo Fruit, mailed free in plain wrap- per. Fill out free coupon below.

FREE RENGU COUPON.

If you suffer from excess fat all you have to do is fill in your name and ad- dress on dotted lines below and mail to Rengo Fruit Co., 1291 Main Street, An- gusta, Mich., and they will mail in plain wrapper, free, a trial package.

The Nevada Hills property is the bonanza mine of Fairview, Churchill county, Nevada. It has much shipping ore exposed for a total distance of over 2000 feet and has recently shipped three car- loads of ore valued at \$30,000. It is considered as being one of the biggest and richest mines in Nevada. The stock is selling freely at over \$3 per share. The group of the Nevada Hills Florence company joins the end line of the Nevada Hills property on the west and is directly on the trend of the great vein which has a general direction east and west. One of the richest shoots of ore is but a couple of hundred feet west of the Nevada Hills Florence lines. See accompanying plot which is accurate.

NEVADA HILLS FLORENCE MINING CO.

OWNING PROPERTY

IN THE HEART OF FAIRVIEW

The property of the Nevada Hills Florence company consists of the Florence No. 3, Blue Bell, Little Fellow and Tripod claims. Title to claims is perfect. The group is in the very heart of the richest producing area and is traversed by six boldly outcropping and well defined veins from which good surface values in gold and silver are obtainable. At fifteen cents per share this stock is un- doubtedly the most sensible, substantial, speculative opportunity of all the Nevada offerings. The six independent veins give it great individual value while the cutting of the extension of the rich and productive Nevada Hills vein, which is trending directly toward us, would immediately advance the price to \$1 per share. The man- agement is conservative, progressive and practical, insuring the thorough development of the many opportunities offered in this enterprise. THE STOCK WILL BE LISTED ON THE SAN FRAN- CISCO, RENO, GOLDFIELD AND SALT LAKE EXCHANGES. NO TIME PAYMENTS ACCEPTED.

Note location of Nevada Hills Florence property and price of stock of adjoining properties.

Nevada Hills \$3.05 Per Share
Fairview Eagle \$1.05 Per Share
